

# Homeworks - Instructions

## Eco 5316 Time Series Econometrics

1. Do the HW, write an R Markdown with your solution in a form of a short report that would contain all relevant work and results and also include a brief explanation/discussion of these results. Use the following filename convention:

`eco5316_sp2016_hwXqY_lastname_firstname.Rmd`

where **X** is the homework number and **Y** is the number of the question on the homework. So if I were to submit my solution for Homework 2 Problem 1, I would name it

`eco5316_sp2016_hw2q1_duras_jan.Rmd`

2. Publish the HTML report on RPubS. Here is a video that shows how that can be done: [RPubs demo](#)
3. Send the links to the RPubS reports and also the RMarkdown files to me and to the TA.
4. After receiving an email with links to the RPubS HWs of your classmates that you will be reviewing, write a short summary providing your feedback and suggestions for improvement. Send these reviews as R Markdown files to the TA by 11.59pm on Thursday in the week following the HW deadline. Use the following filename convention:

`eco5316_sp2016_hwX_lastname_firstname_review.Rmd`

where **X** is the homework number. So if you were assigned my Homework 2, you would name your file

`eco5316_sp2016_hw2_duras_jan_review.Rmd`
